the term civilization comes with considerable baggage dichotomizing people cultures and histories as civilized or not while the idea of civilization has been deployed throughout history to justify all manner of interventions and sociopolitical engineering few scholars have stopped to consider what the concept actually means here brett bowden examines how the idea of civilization has informed our thinking about international relations over the course of ten centuries from the crusades to the colonial era to the global war on terror this sweeping volume exposes civilization as a stage managed account of history that legitimizes imperialism uniformity and conformity to western standards culminating in a liberal democratic global order along the way bowden explores the variety of confrontations and conquests as well as those peoples and places excluded or swept aside undertaken in the name of civilization concluding that the west and the rest have more commonalities than differences this provocative and engaging book ultimately points the way toward an authentic intercivilizational dialogue that emphasizes cooperation over clashes

around 10 000 years ago the small group of paleolithic hunter gatherers that had walked the earth for millennia gave way to increasingly complex neolithic villages of agricultural producers around 4 000 5 000 years later people had gathered in urban settings established laws and developed cultural and political systems this remarkable change took place in mesopotamia on the north china plain in the indus valley in the nile valley on aegean islands in africa and in america what motivated these new forms of culture and social and political complexity why did they appear where they did this course brings together findings from both archaeological and anthropological scholarship to answer these questions and to deepen our understanding of the first human states and civilizations
