christianity islam and judaism all feature ideas about heaven hell and afterlife and these concepts have evolved over time within these religions this work supplies a detailed and coherent understanding of the broad scope of spiritual thinking in the last 3 000 years within the abrahamic traditions heaven hell and the afterlife eternity in judaism christianity and islam provides an all encompassing examination of historic and contemporary perspectives on afterlife in western religions in these three volumes judaic christian and muslim scholars join forces providing an unprecedented review of their individual faith s traditions every significant issue and major theme is discussed no controversial topic is avoided from ancient doctrines to modern day outlooks of conservatives progressives and liberals in all three religions all are analyzed and presented here the framework of the volumes underscores how the ethics and concepts of eternity in the western action religions contrast with eastern religions that tend to be characterized as passive or withdrawal religions in their ethics and their notions of afterlife as absorption within universal spirit nirvana or nonexistence this work is well suited for undergraduate and graduate students general readers interested in religion and professional scholars particularly those in fields corollary to religious study

traditionally university students have gained access to world religions by reading primary texts discovering world religions at 24 frames per second takes students beyond the written page offering an exploration of the same religious traditions through the study of feature films the many definitions of religion are examined along with its various components including doctrine myth ethics ritual and symbol specific religious traditions including hinduism sikhism zoroastrianism buddhism confucianism daoism popular religion and shinto are examined biographical sketches of directors whose films tend to focus on a particular religious tradition are also included such as zhang yimou hayao miyazaki deepa mehta and akira kurosawa discovering world religions at 24 frames per second is unique in the area of religion and film studies in that it isn t just a collection of essays instead it provides the introductory student with the necessary background information on the various religions before looking at how their ideas can be understood not through texts but through the cinematic medium to keep the conversation fresh most of the films used in the book were made within the last decade furthermore examples range from popular mainstream fare such as star wars and the lord of the rings trilogy to lesser known foreign films such as the wooden man s bride and the great yokai war several films with a cult like following are also discussed including fight club princess mononoke spirited away and jacob s ladder this book is also unique in that instead of drawing upon the judeo christian tradition it draws from eastern

traditions

the essays collected together in critics not caretakers argue that the study of religion must be rethought as an ordinary aspect of social historical existence a stance that makes the scholar of religion a critic of cultural and historical practices rather than a caretaker of religious tradition or a font of timeless wisdom and deep meaning the book begins with several essays that outline the basis of an alternative sociorhetorical approach to studying religion before moving on to a series of discrete dispatches from the ongoing theory wars each of which uses the work of such writers as karen armstrong walter burkert benson saler and jacob neusner as a point of entry into wider theoretical issues of importance to the field s future the author then examines the socio political role of this brand of critical scholarship a role that differs dramatically from the type of sympathetic caretaking generally associated with scholars of religion who feel compelled to go public concluding the work is a consideration of how scholars as teachers can address issues of theory method and critical thinking in a variety of undergraduate classrooms the location where they have always been publicly accountable intellectuals the new edition of this still read and for some controversial book preserves the original essays but includes a new opening chapter and new introductory commentaries across all of the chapters to demonstrate how little the field has changed since the volume was first published in 2001 accordingly the book continues to provide a viable alternative for those wanting to take a more critical approach to the study of religion

the concept of religious freedom is the favoured modern human rights concept with which the modern world hopes to tackle the phenomenon of religious pluralism as our modern existence in an electronically shrinking globe comes to be increasingly characterised by this phenomenon to begin with the concept of religious freedom as embodied in article 18 of the universal declaration of human rights seems self evident in nature it is the claim of this book however that although emblematic on the one hand the concept is also problematic on the other and the implications of the concept of religious freedom are far from self evident despite the ready acceptance the term receives as embodying a worthwhile goal this book therefore problematizes the concept along legal constitutional ethical and theological lines and especially from the perspective of religious studies so that religious freedom in the world could be enlarged in a way which promotes human flourishing

this second edition which is intended to reflect both changes in academia and in the world since 1987 includes almost all of the 2 750 original entries many heavily updated as well as approximately 600 entirely new articles it emphasizes religion s role within everyday life and as a unique experience from culture to culture
